EXPERIENCE

Frontend Developer

March 2023 - Present

Janitri Innovations

- Spearheaded the development of a **high-impact internal dashboard**, facilitating seamless data management for stakeholders, leveraging ReactJS and Redux for intuitive UI design.
- Engineered critical **dashboard-type application** for analytics, reports and live monitoring, significantly enhancing decision-making processes in **over 400 hospitals**.
- Achieved **500% improvement in application loading times** and **200% boost in operational efficiency** through optimized code and user-centric design enhancements.
- **Led frontend development team** and **led the software and design team** for the company's new initiatives.

Frontend Developer Intern

Sept 2022 - Feb 2023

Fountain9 (YC W21)

- Redesigned **application filters**, achieving a **40% reduction** in code complexity and a **30% increase in performance** by implementing **Virtualized Lists**, contributing to smoother user experiences.
- Resolved complex **cross-browser compatibility** and security issues, enhancing application reliability and user trust.

Software Developer Intern

June 2022 - Aug 2022

Omniflo

- Led the **front-end development** of Spotlight, a brand and store discovery platform, from inception to deployment, utilizing React and Material UI for a responsive design.
- Implemented dynamic data integration with backend APIs, facilitating brand exposure and user engagement.
